

AMENDMENTS

In the claims

Please amend claim 51 to read as follows:

C1
51. (Amended) A substantially isolated polynucleotide comprising a polynucleotide sequence encoding an antigen binding fragment which competitively inhibits specific binding to a tumor cell surface epitope recognized by an antibody or fragment thereof comprising the amino acid sequences of the H chain V region and the L chain V region of the polypeptide shown in SEQ ID NO: 14.

Please add new claim 85:

C2
85. (New) The polynucleotide of claim 51, wherein the antigen binding fragment specifically recognizes a tumor cell surface epitope specifically recognized by an antibody or fragment thereof comprising the amino acid sequences of the H chain V region and the L chain V region of the polypeptide shown in SEQ ID NO: 14.
